### PROJECTS

#### DUNK OR FLUNK

Github: <https://github.com/iannm93/Dunk-or-Flunk>

Application: <http://dunk-or-flunk-app.herokuapp.com/signup>

Technologies utilized: React, Node.js, Javascript, Express, Axios, balldontlieAPI

An application that allows users to test their NBA knowledge by guessing which players have better proposed statistics. Randomized questions will appear between two random NBA players. The user will guess as to which player has the better statistics. I worked on Page layouts and routes to different pages

- Contribution: Front-end CSS to every page on app, HTML and API routes, creating and editing button layouts to the game

#### RICK AND MORTY:MEMORY GAME

Github: <https://michaelleo.jacob.github.io/Memory-Game/>.

Application: <https://michaelleo.jacob.github.io/Memory-Game>

Technologies utilized : HTML, CSS, Javascript, JQuery, RickandMorty API

An application that allows users to test their Memory with the characters from Rick and Morty as they try to guess with attempts counter counting their every move. This application I worked on with a group where my main objective was to focus on css layout and game logic.

- Contribution: Front-end CSS for the game logic, worked as a group in creating the game logic, created structure layout for HTML

#### PASSWORD GENERATOR

Github: <https://github.com/Kvnvn/password-generator>

Application: <https://kvnvn.github.io/password-generator/>

Technologies utilized : HTML, CSS, Javascript

An application that allows users to randomly generate questions based on certain requested criteria. This application I made independently using strictly javascript.
